Background Information

UCOL's nursing programme must comply with legislated requirements, specifically the Health Practitioners Competence Assurance Act (2003), and the Nursing Council of New Zealand (NCNZ) standards which UCOL must meet before we present a graduate for registration as a nurse.

You must be physically and psychologically able to engage in diverse clinical nursing practice, including acute hospital, aged care and community health settings during this programme. The person in charge of the nursing programme must notify the Registrar of the Nursing Council of New Zealand if they are satisfied a student would be unable to perform the functions required of a nurse because of mental or physical condition. The NCNZ say this includes a condition or impairment caused by alcohol or drug abuse.

The Head of Nursing also has the authority to set entry criteria for student selection into the nursing programmes. UCOL has access agreements with various health providers so nursing students can gain practical experience. These providers have policies and requirements for the protection of their staff and patients and UCOL must comply with these.

So a **declaration of the applicants past and present health** is required for entry into the three programmes listed above. This information enables UCOL to ensure that health and safety requirements for clinical practice areas are met.
